MOBILE HEALTH PROJECT FH Hagenberg 2013

1. Care4Today

Care4Today is an app which is available for Android and iOS. Care4Today describes itself as a new way to organize your medication plans. Users can setup medication plans for each of their medication. Care4Today automatically setup a reminder which notifies the user to take the medication. Family members can be assigned which receive a notification if their relative took or took not the medication. Statistical graphs can be generate which show you the medication intake over time.

Pros:

- Easy setup of medication lists
- Family involvement
- Reminder

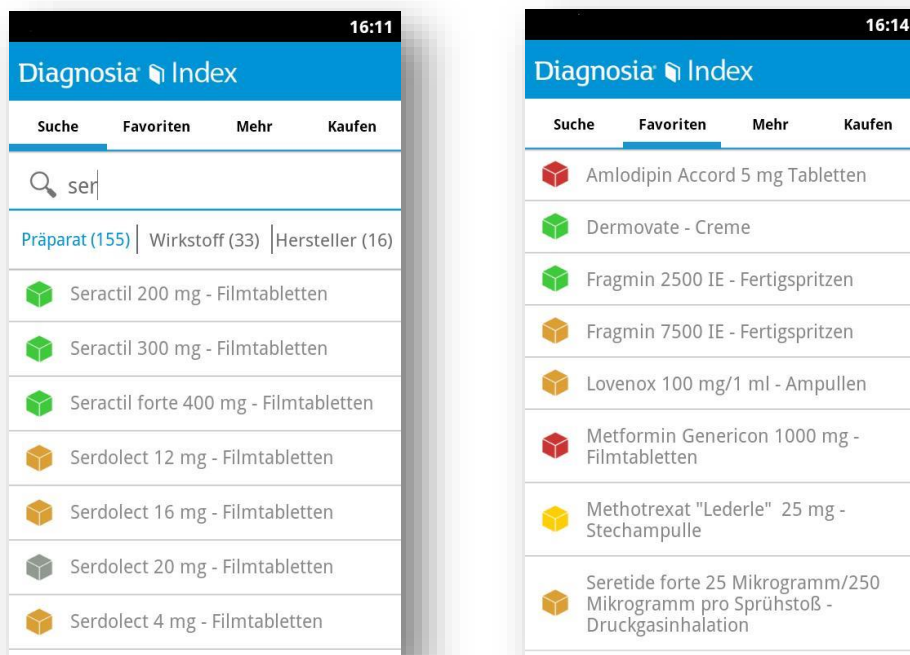

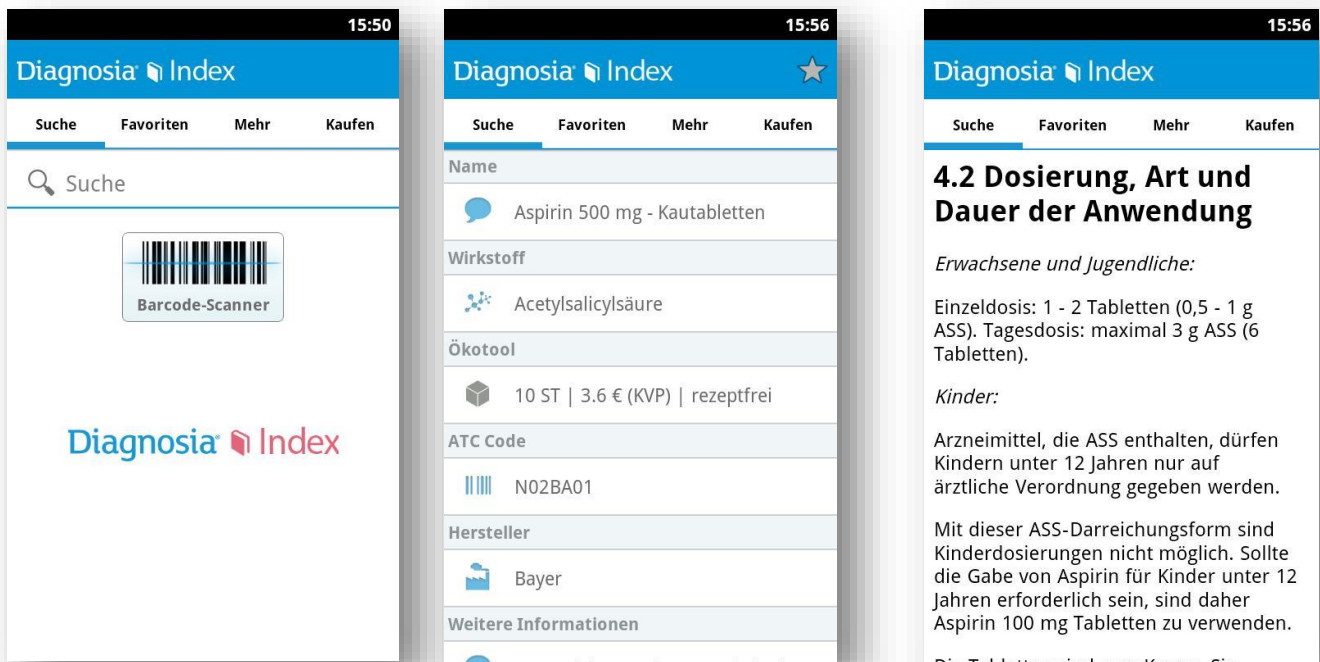

Cons:

- No verification of medication plan
- User interface is not designed for elderly people
- The UI is bloated, too much information on the main screen
- No storyboard

2. Diagnosia

Diagnosia is an online medication database. It provides you easily with information about ingredients and complications with other medications. Diagnosia focuses on doctors and hospital staff. It allows you to access its database either online via a web browser or a dedicated app for Android and iOS.

3. Qualcomm Glowcaps

Glowcaps is different to the previous stated products because it consists of soft and hardware. Glowcaps as the name states are glowing caps which can be attached to medication bucket. You can replace the normal cap with the Glowcap. The glowcaps consists of a small microcomputer which will trigger a LED when you have to take your medication. Additionally to a light pulse notification a sound can be played. The configuration for each Glowcap is carried out by Smartphone.

Pros:

- Brilliant notification (sound and light)
- Helps you finding the medication

Cons:

- Energy consumption
- Complicated setup
- Expensive if you have to take many medications

A screenshot of the GlowCap website banner. The top navigation bar is blue with the 'GlowCap' logo on the left and links for 'ALREADY A SUBSCRIBER? SIGN IN HERE : LOGIN', 'ACTIVATE | SERVICE | PRODUCT | HELP' on the right. The main content area features a white background with a light blue gradient. On the left, there is a photograph of a white 'VITALITY' pill bottle with a white GlowCap attached, and a yellow pill bottle with a blue GlowCap. To the right of the images, the text reads: 'GlowCap® – Remembering so you don't have to.' followed by a paragraph describing the device's functionality: 'GlowCap® fits most prescription bottles and uses light and sound reminders to signal when it is time to take your medications. Inside the cap, a chip monitors when the pill bottle is opened and wirelessly relays alerts, through the AT&T Mobile Broadband Network, to you or your caregiver. A push button at the base of the lid makes refills easier than ever.' A 'LEARN MORE ►' button is located at the bottom right of the text block.

4. Node.js

Node.js enables you to write client side and server side code in one language. Node.js is developed in JavaScript and executed by Google's V8 Engine. It is the same JavaScript Engine that powers Google Chrome. Node.js is an asynchronous web framework which helps you to build faster web applications.

a. Express

- **Web Applications**

Express is a minimal and flexible node.js web application framework, providing a robust set of features for building single and multi-page, and hybrid web applications.

- **APIs**

With a myriad of HTTP utility methods and Connect middleware at your disposal, creating a robust user-friendly API is quick and easy.

- **Performance**

Express provides a thin layer of features fundamental to any web application, without obscuring features that you know and love in Node.js

5. MongoDB

MongoDB (from "humongous") is an open-source document database, and the leading NoSQL database, written in C++. Some of the features of MongoDB are listed below:

a. Document-Oriented Storage

JSON-style documents with dynamic schemas offer simplicity and power.

b. Full Index Support

Index on any attribute, just like you're used to.

c. Replication & High Availability

Mirror across LANs and WANs for scale and peace of mind.

d. Auto-Sharding

Scale horizontally without compromising functionality.

e. Querying

Rich, document-based queries.

f. Fast In-Place Updates

Atomic modifiers for contention-free performance.

g. Map/Reduce

Flexible aggregation and data processing.
